What's Inside the Box

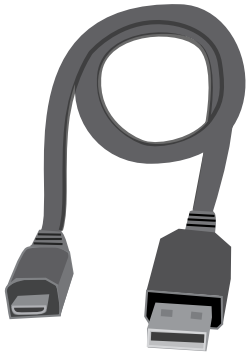
Package Contents

Looxcie

Record and share life's special moments.

USB Power Adapter

Plug into the wall to charge Looxcie. Power off Looxcie prior to charging.



USB Cable

Plug into a computer or power adapter to charge Looxcie. Power off Looxcie prior to charging.

Earbuds

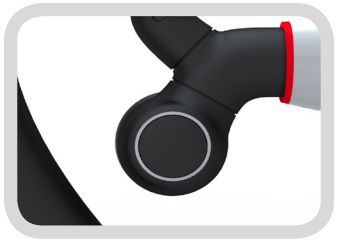
Select the best size earbud for your ear.

Looxcie Controls Overview

Basic Looxcie Controls

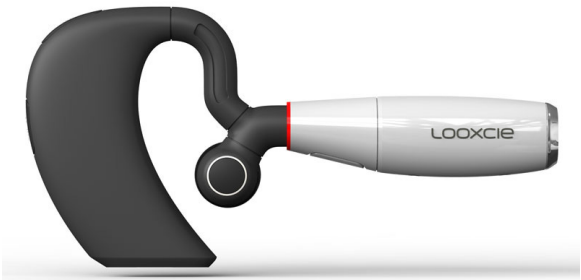
Record button

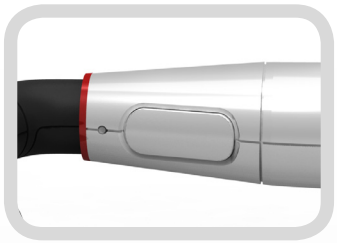
Press to start/stop recording.



Power/Call button

- Press and **hold for 5 seconds** to power on/off Looxcie.
- Press to answer/end a phone call.

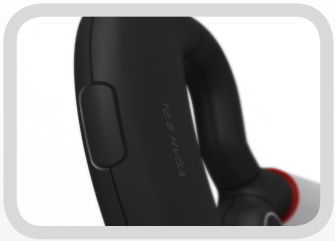




Instant Clip button

- Press and release to create an Instant Clip.
- Press and **hold for approximately 2 seconds** to create and send an Instant Clip to your instant share favorite.

Go to Settings in the LooxcieMoments app to set up instant sharing.



Volume button

Press repeatedly to increase the volume level.

Note: Once the volume reaches its highest level, it cycles back to the lowest level.

Getting Started

Charging Your Looxcie

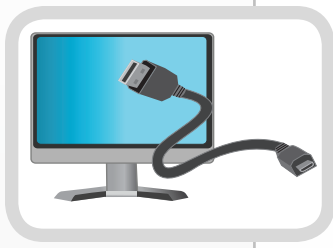
Charge your Looxcie for 2 hours before using it the first time.

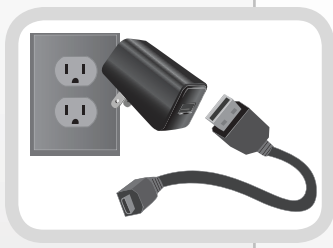
Using the Power Adapter or a Computer

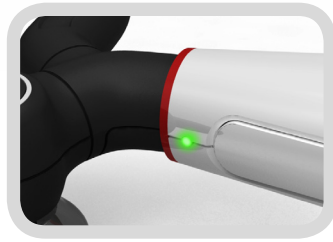
- Power off Looxcie prior to charging.
- Plug one end of the USB Cable into the USB Port on Looxcie, and the other end into the power adapter or a computer USB Port.

Note: Average charging time is around 3 -4 hours.

USB Port







Status light (green)

- Flashes green while charging.
- Stays green once the battery is fully charged.
- Blinks green when Looxcie is powered on.

Record light (red)

Glows red while recording.

Downloading the Looxcie Companion Apps

Use the Looxcie companion apps to preview, edit, and share your video clips.

Download the LooxcieCam and LooxcieMoments apps from the App Store onto your iPhone.

Download apps from App Store

LooxcieMoments

Pairing Looxcie to Your iPhone

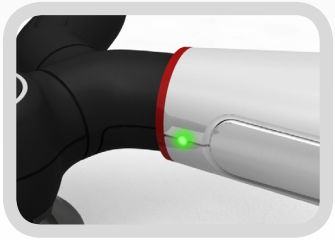
Before pairing, make sure Looxcie is fully charged. Pairing Looxcie to your iPhone connects the companion apps with your Looxcie.

1 Turn on Bluetooth (on your iPhone)

- Turn on your iPhone's Bluetooth (under Settings and General).

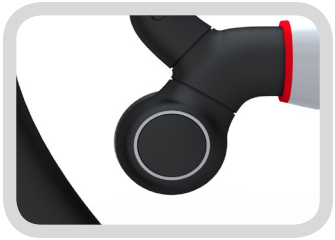
2 Activate pairing mode (on your Looxcie)

- Power on Looxcie by pressing and holding the Power/Call button for 5 seconds. (The green Status light turns on.)
- If the green Status light and red Record light are both flashing, pairing mode is active. (Go to step 3 on the next page.)
- If the green Status light and red Record light are not both flashing, activate pairing mode manually: Press and hold the Volume and Power/Call buttons at the same time until both lights start flashing.

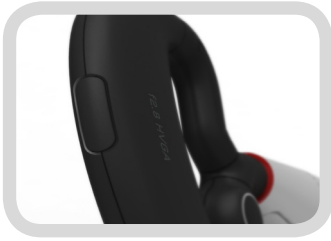


Status light (green)

Record light (red)



Power/Call button



Volume button

Turn on Bluetooth

3 Select Looxcie from the Bluetooth device list

- Select **Looxcie** from the Bluetooth device list.

When paired successfully, Looxcie appears in your mobile device's Bluetooth device list as Connected. (The red Record light will turn off and the green Status light will blink.)

Tip: Check your iPhone's user manual for more information on pairing Bluetooth devices.

Help Me Pair

When the LooxcieMoments and LooxcieCam apps are launched, the Help Me Pair screen will appear if Looxcie is not paired to your iPhone. If you want help pairing:

- Tap **Help Me Pair**.
- Follow the three steps on the next two screens to pair Looxcie to your iPhone.
- Tap **Done** to exit the screen.

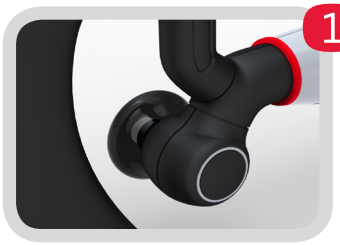
Adjusting Your Looxcie Fit

Personalize the fit of your Looxcie so that it is stable and level on your ear

Personalizing Your Looxcie Fit



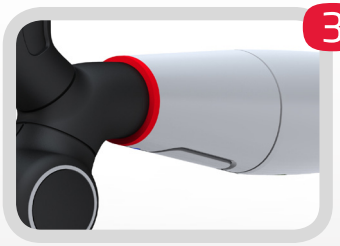
1 Decide which ear to wear Looxcie on

- Rotate the Earpiece to fit on left/right ear.
- Select the best size Earbud for your ear.

Note: Be careful not to over rotate the Earpiece.

2 Level the video image

- Slide Looxcie over your ear.
- Bend the Earloop to fit Looxcie snugly on your ear.
- Bend the Elbow Joint to adjust the Boom up/down (to level the video image).



3 Point Looxcie where you look

Rotate the Boom inward to lightly touch your face.

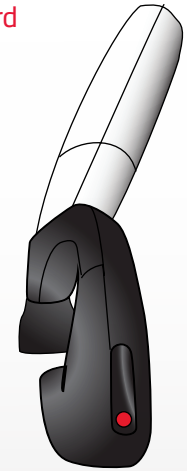
Tip: Use the LooxcieCam or LooxcieMoments viewfinder screen to help level and rotate the boom to level the video image.

Why Fit Matters

Every ear is different in shape and size – when Looxcie fits correctly, it should should point in the direction of where you're looking.

For more help adjusting your Looxcie fit, see the Fit Video online at: www.looxcie.com.

Rotate Boom inward towards your face

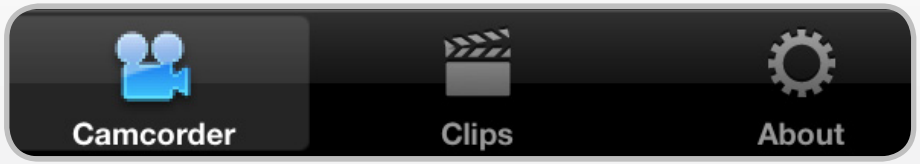


Recording with the LooxcieCam App

LooxcieCam turns your Looxcie into a basic camcorder that records full motion 480p video

LooxcieCam Camcorder screen

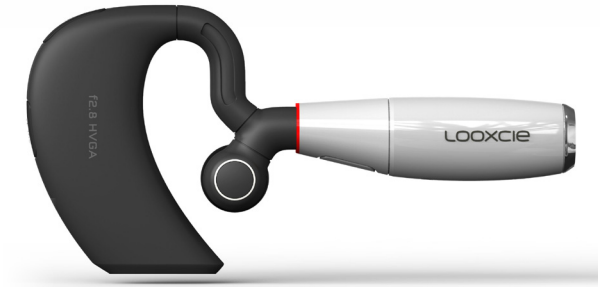
LooxcieCam app menu



See what you're recording

Preview clips you've created

View current Looxcie settings



Use LooxcieCam with your Looxcie to:

- Record 1 hour of 30 fps video in full 480p
- Use your iPhone as a viewfinder
- Transfer and save recorded video to your iPhone or computer by connecting Looxcie via USB

Note: Looxcie must be connected to your iPhone to use the LooxcieCam app functions.

Recording Video with LooxcieCam

To start recording:

- Launch the LooxcieCam app on your iPhone.
- Press and release either the physical Record button on Looxcie or tap the button on the Camcorder screen.

Note: When Looxcie starts recording, you will see the solid red button and a flashing red "Rec" symbol appear on the Camcorder screen.

To stop recording:

- Press and release either the physical Record button on Looxcie or tap the button on the Camcorder screen.

Note: When Looxcie stops recording, it automatically saves your video as a clip.

Tip: The timer on the Camcorder screen shows the number of recordable minutes left.

Level the video image

Go to page 11 to learn how to level the video image.

Tip: Rotate the Camcorder screen to view the video image in either landscape or portrait format.

Record button

Camcorder screen

Changing the light mode

Looxcie automatically adjusts for different light levels.

To adjust the light mode manually:

- Tap the

button on the Camcorder screen.
- Tap on the light mode you want to record with.

Note: When you power off Looxcie, the light mode will default back to Auto.

Tones you might hear while recording

Power On	4 rising tones
Power Off	4 falling tones
Low Battery	2 low tones

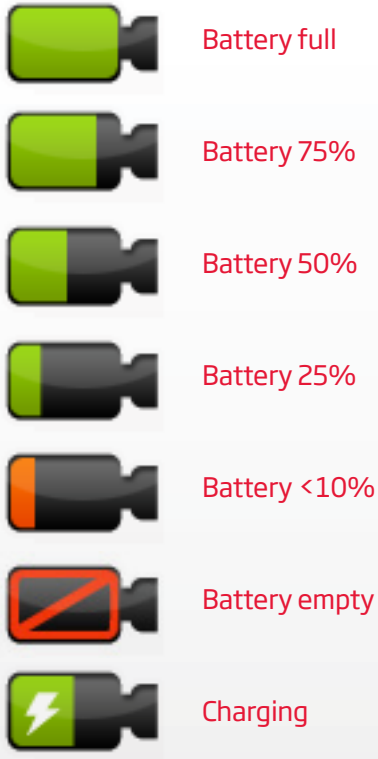
Instant Clip and Share	Multiple tones in long sequence
Start Recording	2 slow rising tones
Stop Recording	2 slow falling tones

Battery Indicator



Previewing Your Clips

Clips created in LooxcieMoments will also appear on the Clips screen. Clips are listed in chronological order with the most recent clip listed first.

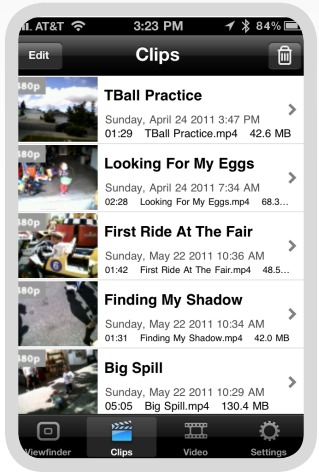
Note: The 480p symbol appears on clips created in LooxcieCam or LooxcieMoments (Highest Quality).

To preview clips:

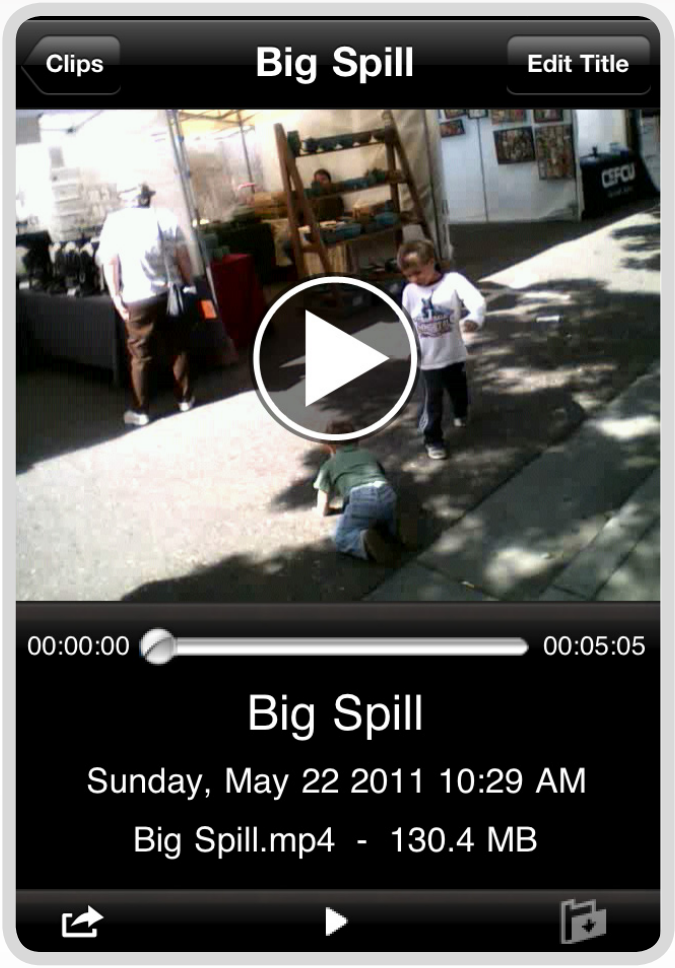
- Tap **Clips** on the LooxcieCam app menu.
- Tap the clip you want to preview.
- Tap the ▶ button on the Clip Details screen to play the clip.

Note: When you preview clips on your iPhone, the playback will be choppy due to limited Bluetooth speed between Looxcie and your iPhone.

Tip: Save the clips to your iPhone, or connect and save to your computer for high-quality playback.



Clips screen



Clips Details screen

Saving Clips to Your iPhone

- Tap **Clips** on the LooxcieCam app menu.
- Tap the clip you want to save.
- Tap the button on the Clip Details screen to save the clip.

Note: Depending on the clip size, saving may take several minutes to hours, due to the limited Bluetooth speed between Looxcie and your iPhone. If your clip is too large to save, transfer the clip to your computer by connecting Looxcie via USB to your computer.

Editing Clip Titles

- Tap **Clips** on the LooxcieCam app menu.
- Tap the clip you want to edit.
- Tap **Edit Title** on the Clip Details screen.
- Tap **OK** to save the clip title.

Deleting Clips

- Tap **Clips** on the LooxcieCam app menu.
- Tap **Edit** on the Clips screen.
- Tap the button next to the clip you want to delete.
- Tap **Delete** to confirm you want to delete the clip.

Recording with the LooxcieMoments App

LooxcieMoments turns your Looxcie into an “always on” video cam ready to instantly share

LooxcieMoments Viewfinder screen

LooxcieMoments app menu

See what you’re recording	Preview clips you’ve created	View captured video and create New Clips	Settings for Recording Quality and Sharing

Use LooxcieMoments with your Looxcie to:

- Capture up to 5 hours of continuous looping video
- Create 30-second Instant Clips or custom length New Clips from captured video
- Save hundreds of clips
- Instantly share clips to social networks

Note: Looxcie must be connected to your iPhone to use the LooxcieMoments app functions.

Recording Video with LooxcieMoments

To start recording:

- Launch the LooxcieMoments app on your iPhone.
- Press and release either the physical Record button on Looxcie or tap the button on the Viewfinder screen.

Note: When Looxcie starts recording, you will see the solid red button on the Viewfinder screen.

To stop recording:

- Press and release either the physical Record button on Looxcie or tap the button on the Viewfinder screen.

Note: When Looxcie stops recording, it automatically saves the captured video on your Looxcie.

Leveling the video image

Go to page 11 to learn how to level the video image.

Tip: Rotate the Viewfinder screen to view the video image in either landscape or portrait format.

Record button

Viewfinder screen

Changing the light mode

Looxcie automatically adjusts for different light levels.

To adjust the light mode manually:

- Tap the

button on the Viewfinder screen.
- Tap on the light mode you want to record with.

Note: When you power off Looxcie, the light mode will default back to Auto.

Tones you might hear while recording

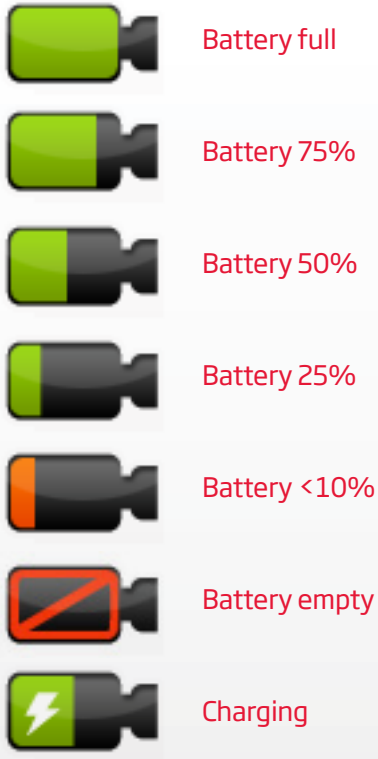
Stop Recording	2 slow falling tones

Battery Indicator



Recording Quality

Record with LooxcieMoments in either Mobile Sharing (320p) or Highest Quality (480p).

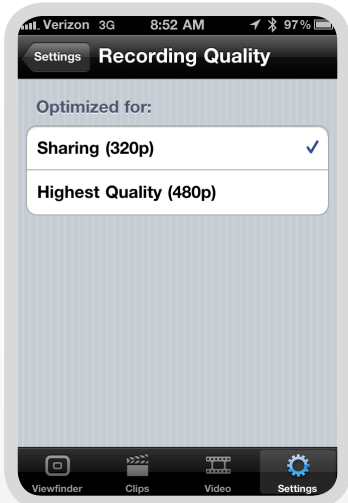
- Use Mobile Sharing (320p) for faster uploading to social networks.
- Use Highest Quality (480p) for higher resolution recording.

Mobile Sharing (320p)

- Record up to 5 hours of continuous looping capture in 320p
- Save 500+ clips from captured video
- Instantly share clips via mobile device with social networks

Highest Quality (480p)

- Record up to 1.5 hours of continuous looping capture in 480p
- Save 100+ clips from captured video
- Share clips via computer with social networks



Recording Quality screen

Changing recording quality

- Tap **Settings** on the LooxcieMoments app menu.
- Tap **Recording Quality**.
- Tap the recording quality you want to record with.

Tip: When you're ready to record, quit the app and place your iPhone in screen saver mode to conserve it's battery. Looxcie will continue to record looping video without the app connected to it.

Creating Clips

Create clips in two ways:

- Press and release the Instant Clip button on Looxcie to create 30 second Instant Clips.
- Tap **Video** on the app menu to create custom length New Clips.

Creating Instant Clips from your Looxcie

To create an Instant Clip of the last 30 seconds of captured video:

- Press and release the Instant Clip button. (You will hear multiple tones.)

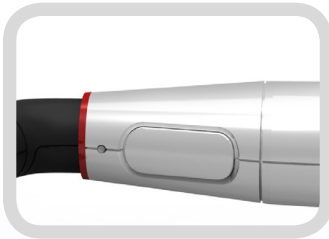
Note: The "Clip created" message will appear on the app screen.

Tip: Press and hold the Instant Clip button for approximately 2 seconds to create and send an Instant Clip to your instant share favorite. Go to page 23 to learn more.

Creating New Clips from your iPhone

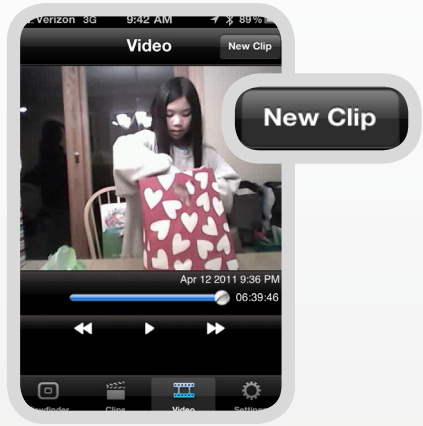
To create a custom length New Clip of up to 30 minutes from the captured video:

- Tap **Video** on the LooxcieMoments app menu.
- Tap **New Clip**.

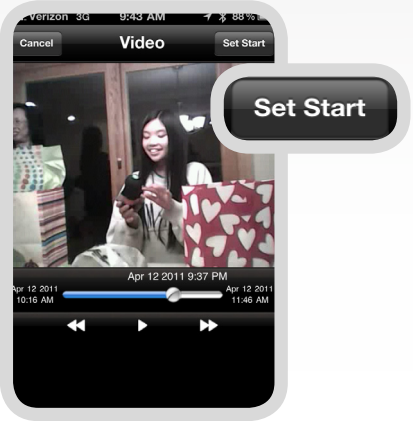


Instant Clip button

Press and release to create a clip of the last 30 seconds of video

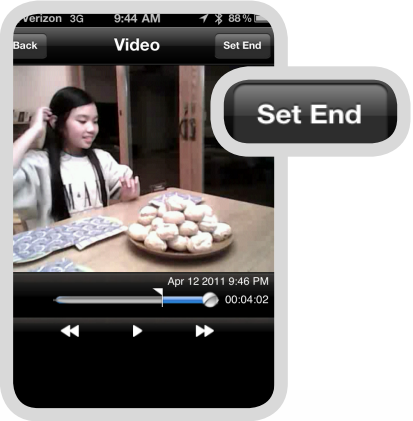


Video screen



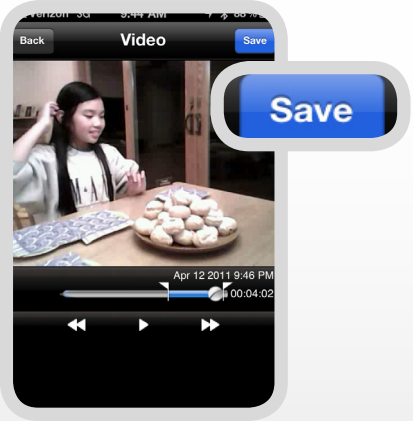
Set the start of your clip

- Drag the pointer along the video scrollbar or use the video controls to set the start of the clip.
- Tap **Set Start.** The Start Clip icon marks the start of your new video clip.



Set the end of your clip

- Drag the pointer along the video scrollbar or use the video controls to set the end of the clip.
- Tap **Set End**. The End Clip icon marks the end of your new video clip.



Save and title your clip

- Tap **Save**. The Edit Title screen will appear.
- Type a new title and tap **OK** or just tap **OK** to create a default title (time and date video created).

Note: The "Saving clip" message will appear on the app screen. Go to page 26 to learn how to edit the title of a clip.

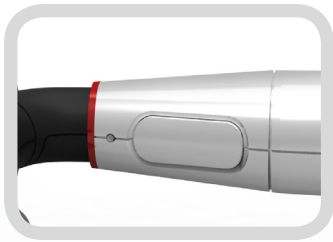
Instantly Sharing Clips While Recording

To instantly share clips, first set up your instant share favorite under Settings. Go to page 29 to learn how.

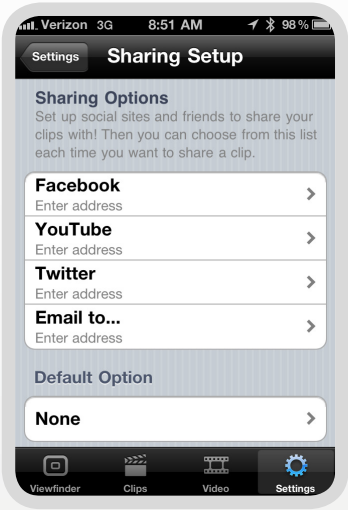
To share an Instant Clip to your instant share favorite:

- Press and hold the Instant Clip button for approximately 2 seconds. (You will hear multiple tones in a long sequence.)

Note: The "Preparing Video for Sharing" message will appear on the app screen while the clip downloads from Looxcie and sends to your instant share favorite.



Instant Clip button



Sharing Setup screen

Previewing Clips

Clips created in LooxcieCam will also appear on the Clips screen. Clips are listed in chronological order with the most recent clip listed first.

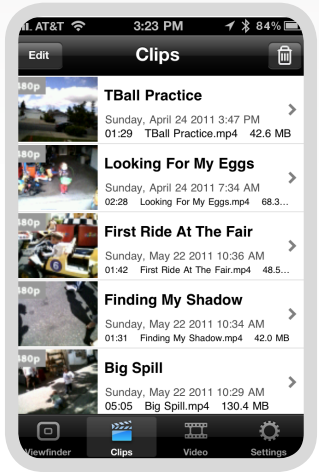
Note: The 480p symbol appears on clips created in LooxcieCam or LooxcieMoments (Highest Quality).

To preview clips:

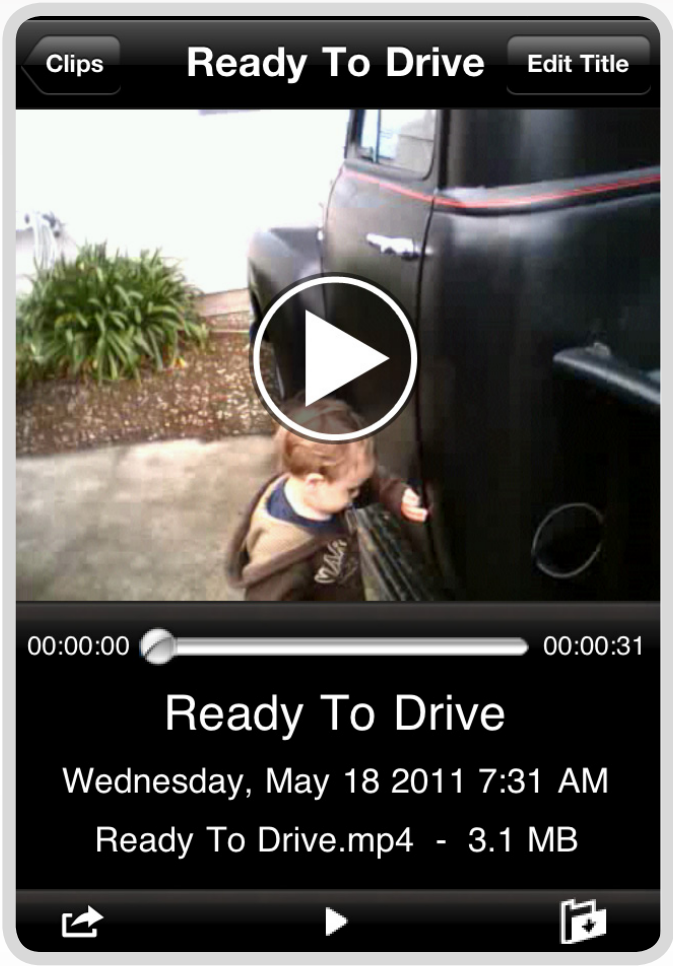
- Tap **Clips** on the LooxcieMoments app menu.
- Tap the clip you want to preview.
- Tap the ▶ button on the Clip Details screen to play the clip.

Note: When you preview clips on your iPhone, the playback will be choppy due to limited Bluetooth speed between Looxcie and your iPhone.

Tip: Save the clips to your iPhone or connect and save to your computer for high quality playback.



Clips screen



Clips Details screen

Sharing Clips

To share clips, first set up your sharing favorites under Settings. Go to page 29 to learn how.

- Tap **Clips** on the LooxcieMoments app menu.
- Tap the clip you want to share.
- Tap the button on the Clip Details screen.
- Tap on the sharing favorite to which you want to send the clip.

Note: The "Sharing clip" message will appear on the app screen while the clip downloads from Looxcie and sends to the sharing favorite you selected. Depending on the clip size, sharing may take awhile and limit your use of the app. Recording will not be interrupted.

Clips waiting to be shared

If your iPhone loses its network connection, the app will queue clips marked for sharing and send them later, when your network connection is restored.

Clip too large

If your clip is too large to share, transfer the clip to your computer by connecting Looxcie via USB to your computer.

Go to page 27 to learn how to transfer clips to your computer.

Sharing Settings

Set up your sharing favorites

Add social sites, like Facebook, Twitter, or YouTube, to your sharing favorites.

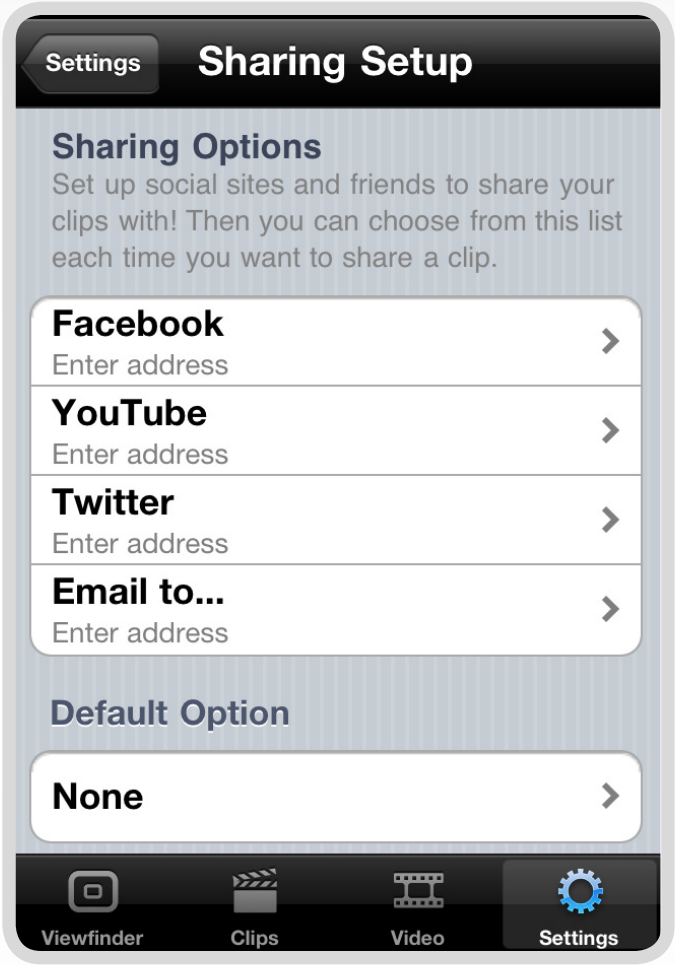
- Tap **Settings** on the LooxcieMoments app menu.
- Tap **Sharing Setup**.
- Tap on the social site you want to add as a sharing favorite.
- Enter your personal upload email address.
- Tap **Done**.

Note: Go to page 30 to learn how to find your personal upload email address for each social site.

Set up your instant share favorite

- Tap the sharing favorite listed under Default Option.
- Tap the the sharing favorite you want to set up as your instant share favorite.

Note: Instant Clips will be sent to this sharing favorite when you press and hold the Instant Clip button.



Sharing Setup screen

Adding social sites to your sharing favorites

To add Facebook, Twitter, or YouTube to your sharing favorites, visit each site to find your personal video upload email address.

Facebook

- Go to www.facebook.com/video/?upload and sign in.
- Choose **Mobile Video** from the menu.
- Find your personal upload email address in the blue box.

Twitvid (for Twitter or Facebook)

- Go to www.twitvid.com/index.php?area=upload and sign in.
- Find your personal upload email address in the "Email or MMS your video to" box.

YouTube

- Go to www.youtube.com/account#mobile and sign in.
- Choose **Mobile Setup** from the menu.
- Find your personal upload email address in the blue box.

Using Looxcie as a Standalone Video Cam

Recording with Looxcie as a "standalone" video cam

- Fit Looxcie on your ear, and adjust the Boom to level the video image. (Use a mirror for help.)
- Power on Looxcie by pressing and holding the Power/Call button for 5 seconds. (The green Status light turns on.)
- Press and release the Record button on Looxcie to start/stop recording.
- Connect Looxcie to your computer via USB to transfer and archive clips and video.

Note: Use the LooxcieDesktop* utility to change the device mode & recording quality on your Looxcie.

Tip: In LooxcieMoments mode, you can create Instant Clips by pressing and releasing the Instant Clip button.

*LooxcieDesktop does not perform the same functions as, nor is it a desktop version of the LooxcieCam or LooxcieMoments mobile apps.

Using the LooxcieDesktop Utility

Get the most out of your Looxcie experience

LooxcieDesktop is a utility that installs on your Windows or Mac computer and extends your Looxcie experience.

Use the LooxcieDesktop Utility with your Looxcie to:

- Update your Looxcie firmware with new features when available.
- Transfer and archive clips for easy editing and backup.
- Switch between LooxcieCam and LooxcieMoments mode on your Looxcie.

Note: LooxcieDesktop does not perform the same functions as, nor is it a desktop version of the LooxcieCam or LooxcieMoments mobile apps.

Updating Your Looxcie Firmware

- Visit www.looxcie.com to install LooxcieDesktop on your computer.
- Connect your Looxcie to your computer using the USB cable.
- Launch the LooxcieDesktop utility on your computer.
- Check for updates and follow the easy instructions on the LooxcieDesktop screen.
